

## Strategy Execution - The Power Of '2-2-2'

*Immediate support is a phone call away. Get ahead in organising your thoughts and translating strategy into effects. **Increase the clarity and power of your intentions and plans.***

### **...Your Need**

Despite being very aware of the specific challenges their businesses are facing, many of our prospective clients are **time poor and juggling multiple priorities**. Have you ever felt the need to transform all that good stuff in your mind into something you can communicate and engage your colleagues with? How about that project, or opportunity, in mind that needs more thought and getting it down on paper, subjecting it to some mental unarmed combat, before involving others? You might have a major initiative underway with little time to step back and think, "is there a better, or easier, way to get this done, accelerate it, or increase its certainty of success?" Perhaps you are facing a novel situation?

What if you could have just **Two hours, Two days, or Two weeks** of an external expert **NOW** to support you in better understanding, or moving to action? The good news is, now you can....

### **...Our Approach**

We will **deploy a Skarbek expert(s) at short notice** for Two hours, Two days, or Two weeks for a **high-intensity deep dive** with you personally, or with your leadership team. It could, for example, help you frame your challenge or problem, shed a new light on your situation with different perspectives, or quickly assist you to **understand your options and take decisive action**. You may also want us to go further and support you in building your implementation strategy and plan.

We are quick to estimate your need and mobilize to give you what you need to **move forward with perspective and clarity**.

## ...The 2-2-2 Concept

---

# 2

hours\*

---

### **FRESH THINKING to unleash action**

A problem shared is a problem halved! Through a 2 hour remote consulting session, we question, explore and synthesize your unique challenges, and offer informed perspectives on context and possibilities.

---
